INTRODUCTION

PURPOSE AND USES OF THE ECONOMIC CENSUSES

The economic censuses are the major source of facts about the structure and functioning of the Nation's economy. They provide essential information for government, business, industry, and the general public.

Economic censuses furnish an important part of the framework for such composite measures as the gross national product, input-output measures, production and price indexes, and other statistical series that measure short-term changes in economic conditions.

Policy-making agencies of the Federal Government use the data, especially in monitoring economic activity and providing assistance to business.

State and local governments use the data to assess business activities and tax bases within their jurisdictions and to develop programs to attract business.

Trade associations study trends in their own and competing industries, and keep their members informed of market changes.

Individual businesses use the data to locate potential markets and to analyze their own production and sales performance relative to industry or area averages.

AUTHORITY AND SCOPE

Title 13 of the United States Code (sections 131, 191, and 224) directs the Census Bureau to take the economic censuses every 5 years, covering years ending in 2 and 7. The 1987 Economic Censuses consist of the—

- Census of Retail Trade
- Census of Wholesale Trade
- Census of Service Industries
- Census of Transportation
- Census of Manufactures
- Census of Mineral Industries
- Census of Construction Industries

Special programs also cover enterprise statistics and minority-owned and women-owned businesses. (The 1987 Census of Agriculture and 1987 Census of Governments are conducted separately.) The next economic censuses are scheduled to be taken in 1993 covering the year 1992.

AVAILABILITY OF THE DATA

The results of each of the economic censuses are available in printed reports, for sale by the U.S. Government Printing Office, and on microfiche, computer tape, compact discs with read-only memory, and flexible diskettes, for sale by the Census Bureau. Order forms for all types of products are available on request from Customer Services, Census Bureau, Washington, DC 20233. A more complete description of publications being issued from this census is on the inside back cover of this document.

Census facts are also widely disseminated by trade associations, business journals, and newspapers. Volumes containing census statistics are available in most major public and college libraries. Finally, State Data Centers in every State and Business and Industry Data Centers in many States also supply economic census statistics.

WHAT'S NEW IN 1987

Several changes have taken place for the 1987 censuses. Data will be reported on the basis of the newly revised Standard Industrial Classification (SIC) system with selected reports including "bridge tables," linking the old and new classification systems. A new set of metropolitan areas has been adopted, and more detailed information will be available for businesses with no paid employees. For additional information on these changes, review the subsequent text.

HISTORICAL INFORMATION

The economic censuses have been taken together as an integrated program at 5-year intervals since 1967, and before that for 1963, 1958, and 1954. Prior to that time, the individual censuses were taken separately at varying intervals.

The economic censuses trace their beginnings to the 1810 Decennial Census, when questions on manufacturing were included with those for population. Coverage of economic activities was expanded for 1840 and subsequent censuses to include mining and some commercial activities. In 1902, Congress established a permanent

Census Bureau and directed that a census of manufactures be taken every 5 years. The 1905 manufactures census was the first time a census was taken apart from the regular every-10-year population census.

The first census of business was taken in 1930, covering 1929. Initially it covered retail and wholesale trade, and construction industries, but it was broadened in 1933 to include some of the service trades.

The 1954 economic censuses were the first to be fully integrated—providing comparable census data across economic sectors, using consistent time periods, concepts, definitions, classifications, and reporting units. These were the first censuses to be taken by mail, using lists of firms provided by the administrative records of other federal agencies. Since 1963, administrative records have also been used to provide basic statistics as well for very small firms, reducing or eliminating the need to send them census questionnaires. The Enterprise Statistics Program, which publishes combined data from the economic censuses, was made possible with the implementation of the integrated census program in 1954.

The range of industries covered in the economic censuses has continued to expand. The Census of Construction Industries began on a regular basis in 1967, and the scope of service industries was broadened in 1967, 1977, and 1987. The Census of Transportation began in 1963 as a set of surveys covering travel, transportation of commodities, and trucks. New for 1987 are publications reporting on business establishments engaged in several transportation industries, paralleling the data on establishments in other sectors. This is part of a gradual expansion in coverage of industries previously subjected to government regulation. The Survey of Minority-Owned Business Enterprises was first conducted as a special project in 1969 and was incorporated into the economic censuses in 1972 along with the Survey of Women-Owned Businesses.

Economic censuses have also been taken in Puerto Rico since 1909, in the Virgin Islands and Guam since 1958, and in the Northern Mariana Islands since 1982.

Statistical reports from the 1982 and earlier censuses provide historical figures for the study of long-term time series, and are available in some large libraries. All of the census data published since 1967 are still available for sale on microfiche from the Census Bureau.

AVAILABILITY OF MORE FREQUENT ECONOMIC DATA

While the censuses provide complete enumerations every 5 years, there are many needs for more frequent data as well. The Census Bureau conducts a number of monthly, quarterly, and annual surveys, the results of which appear in publication series such as *Current Business Reports* (retail and wholesale trade and service industries), the *Annual Survey of Manufactures*, *Current Industrial Reports*, and the *Quarterly Financial Report*. Most of these surveys, while providing more frequent observations, yield less kind-of-business and geographic

detail than the censuses. The *County Business Patterns* program offers annual statistics on the number of establishments, employment, and payroll classified by industry within each county.

SOURCES FOR MORE INFORMATION

More information about the scope, coverage, classification system, data items, and publications for each of the economic censuses and related surveys is published in the *Guide to the 1987 Economic Censuses and Related Statistics*. More information on the methodology, procedures, and history of the censuses will be published in the *History of the 1987 Economic Censuses*. CENSUS OF SERVICE INDUSTRIES

The 1987 Census of Service Industries, part of the 1987 Economic Censuses, covered service industries as defined in Division I of the Standard Industrial Classification (SIC) Manual,¹ except Elementary and secondary schools (SIC 821), Colleges, universities, professional schools, and junior colleges (SIC 822), Labor unions and similar labor organizations (SIC 863), Political organizations (SIC 865), Religious organizations (SIC 866), and Private households (SIC 881). The census also excluded governmental establishments classified in the covered industries, except for government-operated hospitals which were included.

Data are presented for establishments in the following classifications:

SIC code	Title
70	Hotels, rooming houses, camps, and other lodging places
72	Personal services
73	Business services
75	Automotive repair, services, and parking
76	Miscellaneous repair services

This series of reports presents data for service establishments of firms subject to Federal income tax and (in separate tables) of firms which are exempt from Federal income tax under provisions of section 501 or 521 of the Internal Revenue Code. Only establishments with some payroll during the year are included. For a more detailed explanation, see appendix A.

Many of the "kinds of business or operation" included in this report are not thought of as commercial businesses and the terms (such as "business," "establishment," and "firm") used to describe them may not be descriptive of such services, particularly for not-for-profit and professional services. However, these terms are applied to all "kinds of business or operation" to maintain conformity in the measures of the production and delivery of goods and services and in the presentation of data.

The basic tabulations in this report do not include data for establishments which are auxiliary (primary function is providing a service, such as warehousing or bookkeeping) to other establishments within the same company. Data for auxiliaries are presented in a subsequent report issued as part of the 1987 Enterprise Statistics reports.

For the 1987 Census of Service Industries, large- and medium-size firms, plus all firms known to operate more than one establishment, were sent questionnaires to be completed and returned to the Census Bureau by mail. For most very small firms, including those with no paid employees, data from existing administrative records of other Federal agencies were used instead. These records provided basic information on location, kind of business, receipts, payroll, number of employees, and legal form of organization. In addition, more detailed information for selected kinds of business was obtained on the various questionnaires.

Appendix A gives a more detailed explanation of census coverage and methodology.

CENSUS DISCLOSURE RULES

In accordance with Federal law governing census reports, no data are published that would disclose the operations of an individual establishment or business. However, the number of establishments in a kind-of-business classification is not considered a disclosure, so this information may be released even though other information is withheld.

GEOGRAPHIC AREAS COVERED

This report series presents data for the following areas:

1. The United States as a whole.
2. Each State and the District of Columbia.
3. Each consolidated metropolitan statistical area (CMSA) and primary metropolitan statistical area (PMSA) defined by the Office of Management and Budget as of June 30, 1987. A CMSA is an area used to facilitate the presentation and analysis of data for

large concentrations of metropolitan populations. It includes two or more contiguous PMSA's which have a population of at least 1,000,000² and which meet specific criteria of urban character and of social and economic integration.

4. Each metropolitan statistical area (MSA) defined by the Office of Management and Budget as of June 30, 1987. An MSA is an integrated economic and social unit with a population nucleus of at least 50,000 inhabitants.² Each MSA consists of one or more counties meeting standards of metropolitan character; in New England, cities and towns rather than counties are the component geographic units.
5. The area within the State outside metropolitan statistical areas.
6. Each county or county equivalent.^{3 4}
7. Each municipality of 2,500 inhabitants or more incorporated as a city, borough, village, or town.^{2 3}

For the economic censuses, census areas and boroughs in Alaska, boroughs in New York, and towns in New York and Wisconsin are not included in this category.

8. Special economic urban areas (SEUA's), which include townships in New Jersey and Pennsylvania and towns in New England with 10,000 inhabitants or more.²

DOLLAR VALUES

All dollar values presented in this report are expressed in current dollars, i.e., 1987 data are expressed in 1987 dollars and 1982 data in 1982 dollars. Consequently, when making comparisons to prior years, users of the data should consider the inflation that has occurred.

RELIABILITY OF DATA

All data compiled in this report originated from either census questionnaires or administrative records of other Federal agencies and, therefore, are not subject to sampling errors. However, the data are subject to nonsampling errors. Nonsampling errors can be attributed to many sources: inability to identify all cases in the actual universe; definition and classification difficulties; differences in the interpretation of questions; errors in recording or coding the data obtained; and other errors of collection, response, coverage, and estimation for missing or misreported data.

²According to 1980 Census of Population or subsequent special census.

³Those defined as of January 1, 1987.

⁴See appendix F for Alaska, Louisiana, Maryland, Missouri, Montana, Nevada, Virginia, and District of Columbia county equivalents.

The accuracy of these tabulated data is determined by the joint effects of the various nonsampling errors. No direct measurement of these effects has been obtained except for estimation for missing or misreported data; however, precautionary steps were taken in all phases of the collection, processing, and tabulation of the data in an effort to minimize the effects of nonsampling errors.

The Bureau of the Census obtains on computer tape limited information extracted from administrative records of other Federal agencies. This information is used along with other information available to the Census Bureau to develop estimates for nonemployers, small employers, and other establishments for which responses were not received in time for publication. For an indication of the extent that data included in these reports were obtained from the administrative records of other Federal agencies and from estimation, rather than reports directly from respondents, see appendix E. Also, see appendix A for a more detailed explanation of census coverage and methodology.

SPECIAL TABULATIONS

Special tabulations of data collected in the 1987 Census of Service Industries may be obtained, depending on availability of time and personnel, on diskette, computer tape, or in tabular form. The data will be in summary form and subject to the same rules prohibiting disclosure of confidential information (including name, address, kind of business, or other data for individual business establishments or companies) as are the regular publications.

Special tabulations are prepared on a cost basis. A request for a cost estimate, as well as exact specifications on the type and format of the data to be provided, should be directed to the Chief, Business Division, Bureau of the Census, Washington, DC 20233.

To discuss a special tabulation before submitting specifications, call 301-763-5282.

SUMMARY OF FINDINGS

FIRMS SUBJECT TO FEDERAL INCOME TAX

Data from the 1987 Census of Service Industries show that Kansas' 15,523 service industries establishments of firms with payroll that were subject to Federal income tax had receipts totaling \$5.3 billion and payroll of \$2.0 billion. After adjusting for differences in the scopes of the 1982 and 1987 Censuses of Service Industries, the 1987 data represent increases of 63.5 percent in receipts and 64.2 percent in payroll over the 5-year period.

For establishments with payroll, receipts of offices and clinics of medical doctors totaled \$815 million. Other leading service kinds of business in 1987 were legal services with receipts of \$338 million; hotels and motels with \$255 million; and nursing and personal care facilities with \$244 million.

Receipts per establishment averaged \$338 thousand in 1987. Hospitals averaged \$18.7 million per establishment; computer rental and leasing services, \$2.6 million; direct mail advertising services, \$1.36 million; and computer integrated systems design services, \$1.34 million.

Receipts per employee averaged \$41 thousand in 1987. Computer rental and leasing services had receipts per employee of \$415 thousand, which contrasts sharply with the \$13 thousand per employee average for help supply services.

There were 128,013 paid employees (full- and part-time) working in service industries in the State as of mid-March 1987. Nursing and personal care facilities had 13,989 employees; offices and clinics of medical doctors, 11,641 employees; and hotels and motels, 9,150 employees.

Johnson County accounted for the largest percent of the total service industries receipts among all counties in the State, with 27.8 percent. Wichita had the largest receipts among all places in the State, with 25.1 percent of the State total.

ORGANIZATIONS EXEMPT FROM FEDERAL INCOME TAX

Data from the census show that Kansas' 2,603 service industries establishments of firms and other organizations with payroll that were exempt from Federal income tax had revenue totaling \$2.3 billion and payroll of \$1.1 billion in 1987. After adjusting for differences in the scopes of the 1982 and 1987 censuses, the percent increase in expenses was 51.6, and the percent increase in payroll was 45.2.

Revenue of hospitals totaled \$1.6 billion. Other leading classifications were nursing and personal care facilities with revenue of \$117 million, and civic, social, and fraternal associations with \$85 million.

There were 71,007 paid employees (full- and part-time) as of mid-March 1987. Hospitals had 42,951 employees; nursing and personal care facilities, 6,592 employees; and civic, social, and fraternal associations, 3,944 employees.

General Explanation

CENSUS COVERAGE AND METHODOLOGY

Structure and method of enumeration—Firms in the 1987 Census of Service Industries were divided into the nonmail universe and mail universe. The coverage and the method of obtaining census information from each follow:

1. The nonmail universe consisted of firms which were not required to file a regular census return and included:

- a. All taxable nonemployers, i.e., all firms subject to Federal income tax with no paid employees during 1987. Receipts information for these firms was obtained from administrative records of other Federal agencies. Although consisting of many firms, nonemployers accounted for less than 10-percent of total receipts of all establishments covered in the census.

The census included only those service non-employer firms which reported a receipts volume of \$1,000 or more during 1987. Also included were nonemployer firms in operation for less than the full year that reported receipts which, if projected to an annual basis, would have reached a total of \$1,000 or more. Establishments exempt from Federal income tax with no paid employees were excluded as in previous censuses.

Data for nonemployers are not included in this report but are provided in a subsequent Nonemployer Statistics Series of reports (SC87-N).

- b. Selected small employers, i.e., single-establishment firms with payroll below a specified cutoff. (The term "employers" refers to firms with one or more paid employees at any time during 1987 as shown in the active administrative records of other Federal agencies.) Although the payroll cutoff varied by kind of business, small employers generally included firms with 1 to 4 employees and represented about 10-percent of total receipts of establishments covered in the census.

Data on receipts, payroll, and employment for employer firms below the payroll cutoff were derived or estimated from administrative records of other Federal agencies, except for a 10-percent sample of small employer firms in classifications for which specialized data requirements precluded reliance solely on administrative records sources. This sample was included in the mail universe.

2. The mail universe consisted of firms for which information was obtained by means of a mail canvass and included:

- a. Large employers, i.e., all employer firms above the size cutoff referred to in 1b. Within this category, a report of company organization is conducted periodically to identify establishment locations for firms which operated at more than one location and to obtain information on payroll and mid-March employment at each location. The 1986 Report of Company Organization was used as a coverage check in the census. In the census mailing package containing the appropriate 1987 questionnaires, multiestablishment firms also were sent a form to use in updating the list of establishments.
- b. The 10-percent sample of small employer firms in classifications for which specialized data precluded reliance solely on administrative records sources. These firms were sent the census mailing packages containing the appropriate 1987 questionnaire.

Method of classifying kinds of business—The service industries classifications for all establishments were based on the Standard Industrial Classification (SIC) Manual.¹ However, the method of assigning these classifications, and the level of detail at which establishments were classified, differed between the nonmail and mail universes as follows:

1. The nonmail universe

- a. Nonemployers were classified on the basis of information obtained from the administrative records of other Federal agencies.
- b. Selected small employers were classified on the basis of the most current census kind-of-business classification available from one of the Bureau's current sample surveys or the 1982 census. Otherwise, the classification was obtained from the administrative records of other Federal agencies.

If the census or administrative record classifications proved inadequate (none corresponded to a 1987 census classification in the detail required

for employers), the firm was sent a brief inquiry requesting information necessary to assign a 1987 census kind-of-business code.

2. Establishments in the mail universe were classified on the basis of their self-designation, answers to questions on receipts by type of service provided, and other special inquiries.

Method of assigning tax status—For kind-of-business classifications² where there were substantial numbers of taxable and tax-exempt establishments, establishments were classified based on the Federal income tax filing requirement for the establishment or organization. This classification was based primarily on the response to an inquiry on the census questionnaire. Establishments that indicated that all or part of their income was exempt from Federal income tax under provisions of section 501 or 521 of the IRS code were classified as tax-exempt; establishments indicating no such exemption were classified as taxable. All government-operated hospitals were classified as tax-exempt. For establishments in the nonmail universe, the tax status classification was based upon the type of tax return filed by the firm or organization.

For selected kind-of-business classifications³ comprised primarily of tax-exempt establishments, all establishments in those classifications were defined as tax-exempt. All establishments in the remaining kind-of-business classifications (comprised primarily of taxable establishments) were defined as taxable.

COMPARABILITY OF THE 1982 AND 1987 CENSUSES

The 1982 and 1987 censuses were conducted under similar conditions and procedures except for the following:

Classifications—In 1982, kind-of-business classifications were based on the 1972 Standard Industrial Classification (SIC) Manual and its 1977 Supplement. In 1987, these classifications are based on the 1987 SIC Manual. There are major revisions to the earlier SIC structure which limit the comparability of data between the 1982 and 1987 censuses. The 1987 SIC-based kind-of-business classifications for service industries are described in detail in the "Kind-of-Business Classifications" section below, and those which have significantly changed from 1972 to 1987 are listed in appendix H.

1982 data could not be retabulated based on the revised 1987 SIC system to allow data comparability since, in many cases, information needed to assign the 1987 classifications to the 1982 records was not available. However, 1987 census records were assigned both a 1987 and 1972 SIC-based classification. Census data for 1987

are presented based on the 1987 classifications for all geographic areas included in this publication (see "Geographic Areas Covered" in the Introduction). In addition, Tables 3a and 3b present data for both 1982 and 1987 based on the 1972 SIC system. Tables 4a and 4b present 1987 data for those SIC's (1972 based) that significantly changed.

Geographic areas—The boundaries of a number of areas for which data are shown in the 1987 census are not the same as in the 1982 census because of annexations, other boundary changes, and redefinitions of 1982 standard metropolitan statistical areas (SMSA's) and standard consolidated statistical areas (SCSA's) into metropolitan statistical areas (MSA's), primary metropolitan statistical areas (PMSA's), and consolidated metropolitan statistical areas (CMSA's).⁴

Nonemployer firms—In 1982, data for nonemployer firms and the combined data for "all establishments" (nonemployer firms plus establishments of employer firms) were published at the United States level only. Furthermore, data could not be published for several kind-of-business classifications, including the total level, because many businesses were miscoded into miscellaneous categories rather than into a specific kind of business.

For 1987, the Geographic Area Series of reports (SC87-A) only includes establishments with payroll. Data for nonemployers by kind of business are presented in the Nonemployer Statistics Series of reports (SC87-N). Data are shown for the United States, States, metropolitan statistical areas, counties, and places at varying levels of industry detail.

Scope—The 1987 Census of Service Industries includes Hospitals, SIC 806, whereas the 1982 census did not include this SIC Group. For 1987, hospitals operated by governmental organizations are included. Government-operated facilities in other service kind-of-business classifications are excluded from the census.

Establishments—In 1982 and prior censuses, the count of establishments represented the number in business at the end of the year. In 1987, the count of establishments represents those in business at any time during 1987 (regardless of operating status at the end of the year).

⁴Newly defined metropolitan statistical areas (MSA's) and also certain terminology changes were announced by the Office of Management and Budget (OMB) effective June 30, 1983. The previous term "standard metropolitan statistical area" was shortened to "metropolitan statistical area." If an area has more than one million population and meets certain other specified requirements, it now is termed a "consolidated metropolitan statistical area" (CMSA) and consists of major components recognized as "primary metropolitan statistical areas" (PMSA's). Many of these PMSA's were formerly recognized as SMSA's and the majority were also included in standard consolidated statistical areas (SCSA's) defined by OMB beginning in 1975, each of which consisted of two or more closely associated SMSA's. Metropolitan areas not included in CMSA's are designated simply as metropolitan statistical areas (MSA's).

³SIC's 7041, 8111 pt., 84 pt., 86, 8733.

A comparison of the number of establishments in business at the end of the year versus the number active any time during the year for the United States as a whole is presented in appendix G.

Federal income tax status/kind-of-business combinations—In both the 1982 and 1987 censuses, establishments in selected kind-of-business classifications were tabulated as taxable or tax-exempt based solely on their assigned classification, whereas establishments in other classifications were assigned tax status based on their Federal income tax filing requirement (see Method of Assigning Tax Status description of the Census Coverage and Methodology section). Three kinds of business for which tax status was assigned based on Federal income tax status filing requirements in 1982 were treated differently in 1987. Hotels (part of SIC 7011) were tabulated only as taxable in 1987. Membership organization hotels and lodging places (SIC 7041) and Noncommercial research organizations (SIC 8733) were tabulated only as tax-exempt in 1987.

EXPLANATION OF TERMS

Establishments—An establishment is a single physical location at which business is conducted. It is not necessarily identical with a company or enterprise, which may consist of one establishment or more. Statistics for service industries represent a summary of reports for individual establishments rather than companies. For cases where a census report was received, separate information was obtained for each location where business was conducted. When administrative records of other Federal agencies were used instead of a census report, no information was available on the number of locations operated. Estimates of this number were derived from a sample and are provided in the service industries report, Miscellaneous Subjects (SC87-S-4). Each census report was tabulated according to the physical location at which the business was conducted. The count of establishments represents those in business at any time during 1987.

When two activities or more were carried on at a single location under a single ownership, all activities generally were grouped together as a single establishment. The entire establishment was classified on the basis of its major activity, and all data for it were included in that classification. However, when distinct and separate economic activities (for which different industry classification codes were appropriate) were conducted at a single location under a single ownership, and when conditions prescribed by the SIC manual for recognizing the existence of more than one establishment were met, separate establishment reports for each of the different activities were obtained in the census.

Leased service departments (separately owned businesses operated as departments or concessions of other service establishments or of retail businesses, such as a

separately owned shoeshine parlor in a barber shop, or a beauty shop in a department store) are treated as separate service establishments for census purposes. Leased retail departments located in service establishments (e.g., a gift shop located in a hotel) are considered separate retail establishments.

Firms—A firm is a business organization or entity consisting of one domestic establishment (location) or more under common ownership or control. All establishments of subsidiary firms are included as part of the controlling firm. For the economic censuses, the terms “firm” and “company” are synonymous.

Receipts (Basic dollar volume measure for service establishments of firms subject to Federal income tax)—Includes receipts from customers or clients for services rendered, from the use of facilities, and from merchandise sold during 1987 whether or not payment was received in 1987, except for health practitioners and legal, architectural, engineering, and surveying services, which reported on a cash basis (payments received in 1987 regardless of when services were rendered). Excise taxes on gasoline, liquor, tobacco, etc., which are paid by the manufacturer or wholesaler and passed on in the cost of goods purchased by the service establishment, are also included. Receipts from leasing of vehicles, equipment, etc. marketed under operating leases are included in receipts figures as well as the fair sales value of merchandise marketed in 1987 under capital, finance, or “full payout” leases. Receipts also include the total value of service contracts, amounts received for work subcontracted to others, and dues and assessments from members and affiliates.

Receipts are net after deductions for refunds and allowances for merchandise returned by customers. Receipts do not include sales, occupancy, admissions, or other taxes collected from customers and remitted directly by the firm to a local, State, or Federal tax agency, nor do they include income from such sources as contributions, gifts, and grants; dividends, interest, and investments; or sale or rental of real estate. Also excluded are rents from and receipts (gross as well as the establishment’s share) of departments and concessions which are operated by others; sales of used equipment rented or leased to customers; commissions from vending machine operators; and other nonoperating income such as royalties, franchise fees, etc.

Receipts in this report do not include service receipts of manufacturers, wholesalers, retail establishments, or other businesses whose primary activity is other than service. They do, however, include receipts other than from services rendered (e.g., sale of merchandise to individuals or other businesses) by establishments primarily engaged in performing services and classified in the service industries.

Revenue (Basic dollar volume measure for firms exempt from Federal income tax)—Includes revenue

from customers or clients for services rendered and merchandise sold during 1987, whether or not payment was received in 1987. Also included are income from interest, dividends, gross contributions, gifts, grants (whether or not restricted for use in operations), rents, royalties, dues and assessments from members and affiliates, and net receipts from fundraising activities. Receipts from taxable business activities of firms exempt from Federal income tax (Unrelated Business Income) are also included in revenue.

Revenue does not include sales, admissions, or other taxes collected by the organization from customers or clients and paid directly to a local, State, or Federal tax agency; income from the sale of real estate, investments, or other assets (except inventory held for resale); gross receipts of departments, concessions, etc., which are operated by others; and amounts transferred to operating funds from capital or reserve funds.

Expenses—Expenses include payroll, employee benefits, interest, rent, taxes, cost of supplies used for operation, depreciation expenses, fees paid for fundraising, contracted or purchased services, and other expenses charged to operations during 1987.

Expenses in this report exclude outlays for the purchase of real estate; construction and all other capital improvements; funds invested; assessments or dues paid to the parent or other chapters of the same organization; and, for fundraising organizations, funds transferred to charities and other organizations.

Annual payroll—Payroll includes all forms of compensation, such as salaries, wages, commissions, bonuses, vacation allowances, sick-leave pay, and the value of payments in kind (e.g., free meals and lodgings) paid during the year to all employees. Tips and gratuities received by employees from patrons and reported to employers are included. For corporations, payroll includes amounts paid to officers and executives; for unincorporated businesses, it does not include profit or other compensation of proprietors or partners. Payroll is reported before deductions for social security, income tax, insurance, union dues, etc. This definition of payroll is the same as that used by the Internal Revenue Service on form 941.

First quarter payroll—This item consists of payroll, as defined above, paid to persons employed at any time during the quarter January to March 1987.

Paid employees for pay period including March 12—Paid employees consist of the full-time and part-time employees, including salaried officers and executives of corporations, who were on the payroll during the pay period including March 12. Included are employees on paid sick leave, paid holidays, and paid vacations; not included are proprietors and partners of unincorporated businesses. The definition of paid employees is the same as that used on IRS form 941.

Legal form of organization—The legal form of organization for firms in the mail universe was based on the response to the organizational status inquiry on the various census forms. The legal form of organization of nonmail firms was generally based on information from administrative records of other Federal agencies.

Limited data are published in this series of reports for individual proprietorships and partnerships. The service industries report, *Establishment and Firm Size (Including Legal Form of Organization)*, SC87-S-1, presents data by the following legal forms of organization for establishments of firms subject to Federal income taxes:

1. Corporations.
2. Individual proprietorships.
3. Partnerships.
4. Other.

Auxiliary establishments—Each company included in this census was asked to identify and separately report auxiliary locations whose primary functions were to manage, administer, service, or support the activities of the other establishments of the company. Data presented in this report do not include auxiliary establishments. Data for auxiliaries are presented in a subsequent report issued as part of the 1987 Enterprise Statistics reports.

KIND-OF-BUSINESS CLASSIFICATIONS

Services, as defined in Division I of the 1987 Standard Industrial Classification (SIC) manual, includes establishments primarily engaged in rendering a wide variety of services to individuals, business and government establishments, and other organizations.

Establishments covered by the census were assigned kind-of-business classifications according to the industry classifications defined in the 1987 SIC manual. When a more detailed classification than defined in the SIC manual was needed, additional kinds of business were identified within an SIC industry.

The basis for a kind-of-business classification is described above in Method of Classifying Kinds of Business. Descriptions of those kinds of business for which data are provided in this report follow.

Hotels, Rooming Houses, Camps, and Other Lodging Places (SIC Major Group 70)

Final Reports

Geographic area series—52 reports (SC87-A-1 to -52)

A separate paperbound report containing data for establishments with payroll is being published for each State, the District of Columbia, and the United States. For establishments of firms subject to Federal income tax, each State report presents general statistics on number of establishments, receipts, payroll, and employment, by varied service classifications, for the State, MSA's, counties, and places with 350 service establishments or more, by kind of business. Greater kind-of-business detail is shown for larger areas. In addition, for places with 2,500 inhabitants or more and for all counties, statistics are provided on number of establishments and receipts for 10 major kind-of-business groups. For establishments of firms exempt from Federal income tax, each State report presents statistics on number of establishments, revenue, payroll, and employment by varied service classifications, for the State and MSA's. Greater kind-of-business detail is shown for larger areas.

The United States Summary report presents data for the United States as a whole for establishments with payroll of firms subject to Federal income tax, as well as those exempt from Federal income tax, for detailed kind-of-business classifications. Statistics on number of establishments and receipts/revenue are also shown for States and MSA's by kind of business.

For each State, the District of Columbia, and the United States, 1987 data are provided on receipts/revenue and employees per establishment and on receipts/revenue and payroll per employee. Four separate reports are being issued, each containing data for the States located in the four different regions. Data are included by kind of business for all establishments, establishments with payroll, and establishments without payroll for the United States. Also presented are statistics for establishments without payroll on number of establishments and receipts/revenue by varied service classifications for each State and, within each State, for MSA's, counties, and places with 2,500 inhabitants or more.

Subject series—4 reports (SC87-S-1 to -4)
